Dear New Sixth Grader,

My name is Noah Garrabrant. I went to Bryant Elementary. I love playing sports;

baseball is my favorite. I also play soccer and basketball. I have a seven-year-old brother who goes to Bryant. I like hanging out with my friends, and over the summer vacation I go to New

Jersey with my family.

On the first day of Eckstein I was a little nervous because I was going to a new school

that is larger than I had been to. Once school got going however, it felt just like my old school. To me, the weirdest parts of middle school were going from class to class and waking up at

6:50 A.M. My favorite class is science.

In sixth grade there are lots of activities to choose from during the year. The OST (Out Of

School Time) has lots of after school classes to do. The sixth grade has some field trips that are

really fun. The first was when we went Skate King. We roller skated and hung out with friends

and it's all sixth grade! Later in the year you will go to the Science Center. You will look at

exhibits and then see a 3-D movie. On the last day of school there is an all sixth grade party.

There are games, a movie, fun activities, ice cream, and even a magician.

Advice I can give to you for success in sixth grade is to do your work right when you get

it; it actually works! Other advice I would give is don't give people your locker combination, this

is common sense. Don't be worried about making friends because it's the easiest thing to do in

sixth grade.

Good luck on your first year in middle school.

Your friend,

Noah Garrabrant
